Declaration by the European Alliance for Israel (EAI)

The EAI, in these difficult times the State of Israel is going through, assures the people of Israel of its full support and of its solidarity in its battle against the wave of hatred and violence. The resurgence of barbarism, terrorism and actions destroying democracy can and must not leave Europe unheeding. With consternation the EAI observes that the wave of attacks is occurring due to a flagrant lie, a calumny organized in order to sow terror and consisting in affirming wrongly that the Israeli Government have a project to destroy the Al Aqsa Mosque. This slanderous denunciation is being orchestrated by the Hamas and by other supporters of international terrorism.

It also denounces the silence and blindness of governments and international organisations that ignore the seriousness of the moment. They disregard that the attacks in Israel intend to weaken the universal values of civilization.
